

## PNEUMATIC COP 131EB

COP 131EB is a separate rotation, all-round bench driller, with a high penetration rate. An effective silencing is a standard feature on this machine (yellow part on this picture). It is suitable for use in road embankment and construction work, production drilling in quarries and many other types of bench drilling applications. The COP 131EB is an efficient and reliable rock drill with minimum service requirements.

Technical specification	
Impact power, max.	11.2 kW
Hole range	51 - 89 mm
Working pressure, max.	6 bar
Impact rate, max.	39 Hz
Weight	179 kg
Length	700 mm
Rotation speed	0 - 95 rpm
Adapter type	R32, T38, T45
